

**SAFE, EFFICIENT
AND RELIABLE**

Mobile Steam Boilers

Platinum Endeavors Ltd. (PEL) offers mobile steam boiler services for industrial, turnaround, railway and remote operations across Canada. Our fully self-contained boiler units are designed for rapid deployment, providing high-pressure steam exactly where and when it's needed. 30HP - 200HP high pressure boilers available.

These units are ideal for winter operations heating fluid, thawing lines, supporting shut down operations, providing steam to railcars for transloading or supporting drilling and completions operations. PEL ensures your project stays on schedule and compliant with operational safety standards.

Key Services

- **Completions/Drilling Support:** Efficient heat application to support onsite operations in the toughest winter conditions.
- **Fluid Heating:** Heating fluids in winter conditions to prevent freeze up or reduce viscosity for more efficient pumping. Perfect for railway, mining and municipal operations.
- **Industrial Cleaning:** Support for tank and railcar cleaning processes.
- **Transloading Support:** Reliable steam supply to support transloading operations in trucking, railway and anywhere fluid is being transported or pumped.
- **Turnaround & Shutdown Support:** Reliable steam supply during plant maintenance or boiler failure.

Key Benefits

- Reduces project delays by providing instant heat and steam on-site.
- Eliminates the need for costly fixed steam infrastructure.
- Enhances safety and efficiency during cleaning and degassing.
- Easily deployed to remote job sites or client facilities.
- Integrated service with PSL's tank, rail, and nitrogen solutions.
