

**SAFE, EFFICIENT
AND RELIABLE**

Combo Unit Services

Platinum Solutions Ltd. (PSL) provides combo vac services using dual-purpose vacuum and high-pressure wash trucks designed for the most demanding industrial, railcar, and field applications. Our combo vacs are highly effective for fluid removal, line flushing, sludge handling, and surface cleaning.

These units support a wide range of operations—from plant turnarounds, well-site maintenance, railcar cleaning, tank cleaning and many other industrial applications.

Key Services

- **Fluid Recovery:** Removal of water, oils, sludge, and contaminated materials.
- **High-Pressure Washing:** Effective cleaning of railcars, tanks, and equipment.
- **Line Flushing:** Clear blockages and debris from lines, hoses, and piping systems.
- **Railcar & Tank Cleaning Support:** Paired with PSL cleaning and steam units for total service.
- **Emergency Spill Response:** Mobilized quickly to assist with environmental cleanups.

Key Benefits

- Dual-function combo units reduce equipment needs and cost.
- High-performance operation in plant, field, and rail environments.
- Ideal for routine cleaning or emergency situations.
- Fully mobile with experienced, safety-trained operators.
- Seamless integration with other PSL service lines.
