

**SAFE, EFFICIENT
AND RELIABLE**

Railcar Flaring

Platinum Solutions Ltd. (PSL) provides mobile railcar flaring services across Canada, helping clients safely and efficiently remove residual or excess product from railcars containing volatile or hazardous commodities.

Our trained operators manage controlled flaring operations on-site, significantly reducing risk, turnaround time, and costs associated with transporting railcars to fixed facilities. Flaring is performed in full compliance with local environmental regulations and Transport Canada guidelines.

Key Services

- ✓ **Mobile Flaring Units:** Deployed to customer sites, sidings, or yards.
- ✓ **Controlled Product Disposal:** Safely eliminates vapors and hydrocarbons from tanks.
- ✓ **Emergency & Scheduled Support:** Available for both urgent and planned maintenance.
- ✓ **Regulatory Compliance:** Operations meet all AER, provincial, and federal flaring regulations.
- ✓ **Integrated with Cleaning Services:** Combined packages for end-to-end tank preparation.

Key Benefits

- ✓ Eliminates costly railcar shop delays.
- ✓ Reduces environmental and operational risk.
- ✓ On-site service minimizes transportation costs.
- ✓ Ideal for time-sensitive product offloading.
- ✓ Full documentation and compliance tracking provided.
