

SAFE, EFFICIENT AND RELIABLE

Industrial Tank Cleaning

Platinum Solutions Ltd. (PSL) specializes in industrial tank cleaning services for a wide range of applications, including asphalt, crude oil, fuel, chemical, food-grade and many other commodities. Our experienced crews are trained in confined space entry, gas testing, and hazard mitigation, delivering safe and compliant cleaning under complex conditions.

Using both manual and automated solutions, we adapt to the unique requirements of each project—whether it's a scheduled turnaround or an emergency cleaning situation. PSL ensures a clean, safe, and inspection-ready tank every time.

Key Services

- **Confined Space Entry Cleaning:** Full interior cleaning using certified confined space crews.
- **Automated Tank Cleaning:** Reduced personnel exposure with efficient mechanical systems.
- **Asphalt, Fuel & Chemical Tanks:** Specialized cleaning methods for heavy and hazardous residues.
- **Turnaround and Shutdown Support:** Rapid mobilization to meet tight project timelines.
- **Degassing, Venting & Gas Testing:** Support for pre-entry safety compliance and inspections.

Key Benefits

- Minimized downtime and disruption to operations.
- Full safety compliance with COR certification.
- Custom solutions tailored to commodity type and tank design.
- Highly experienced crews trained above industry standards.
- Equipment and personnel ready for mobilization across Canada.
